COURSE CODE : CSA1304

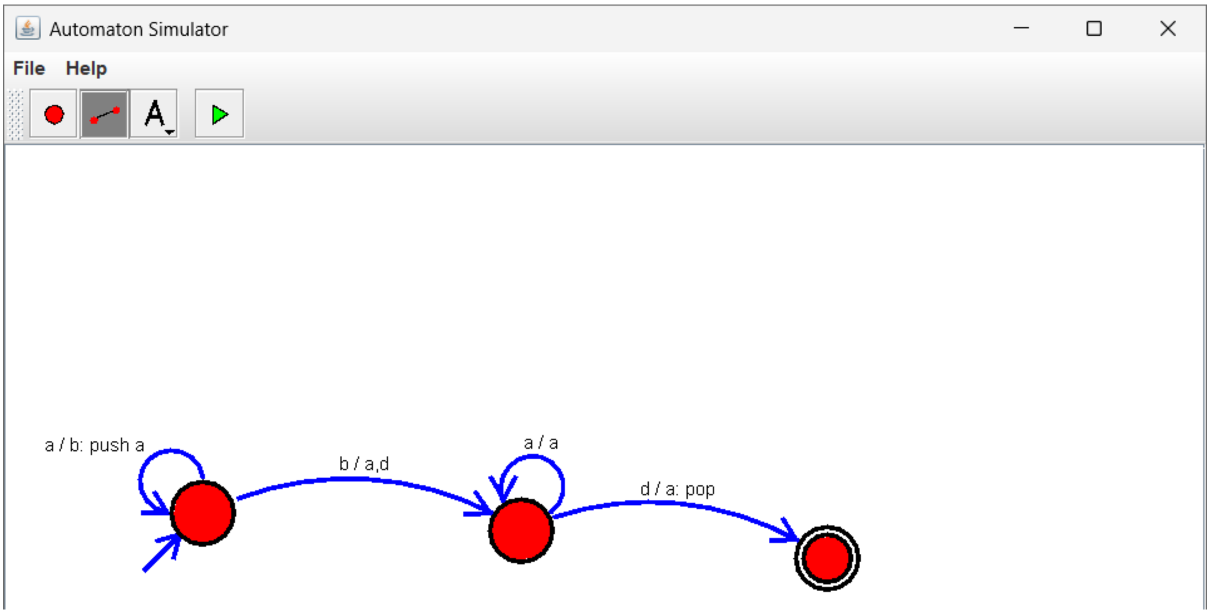
COURSE NAME : THEORY OF COMPUTATION

Girija B

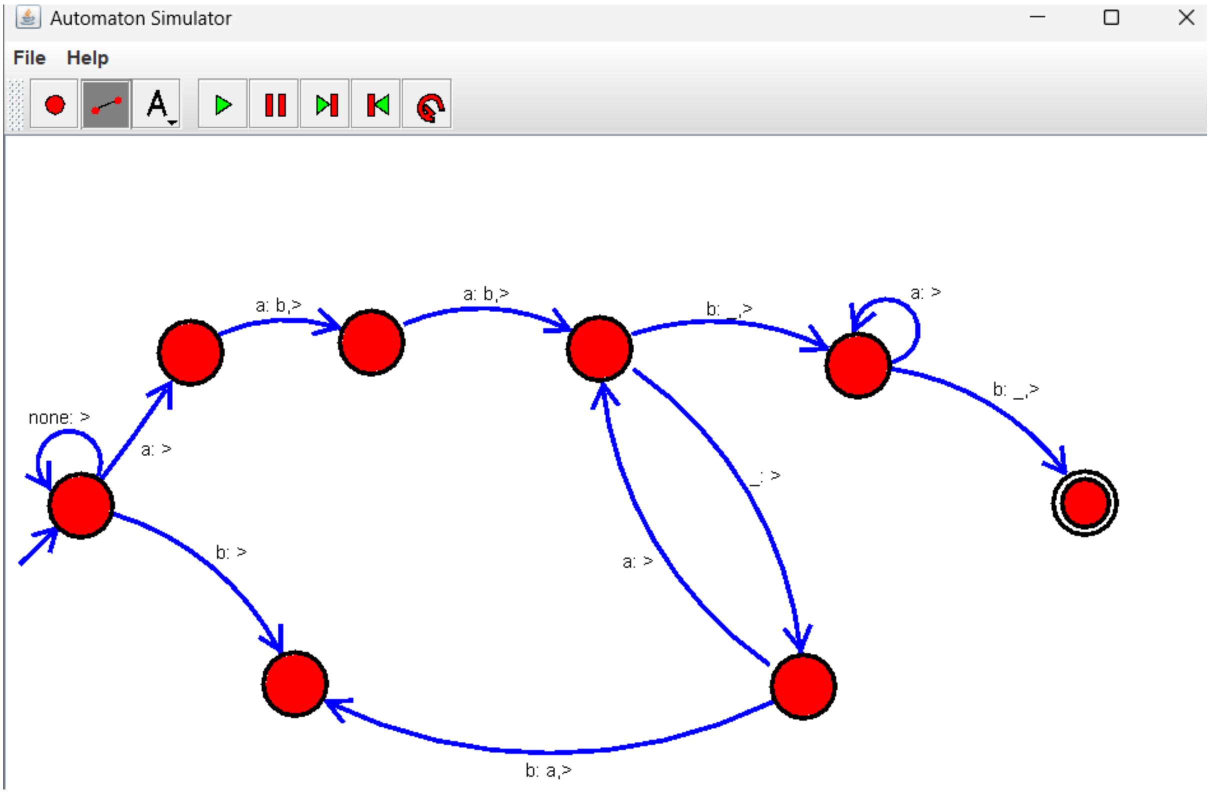
192311044

Lab Exercise

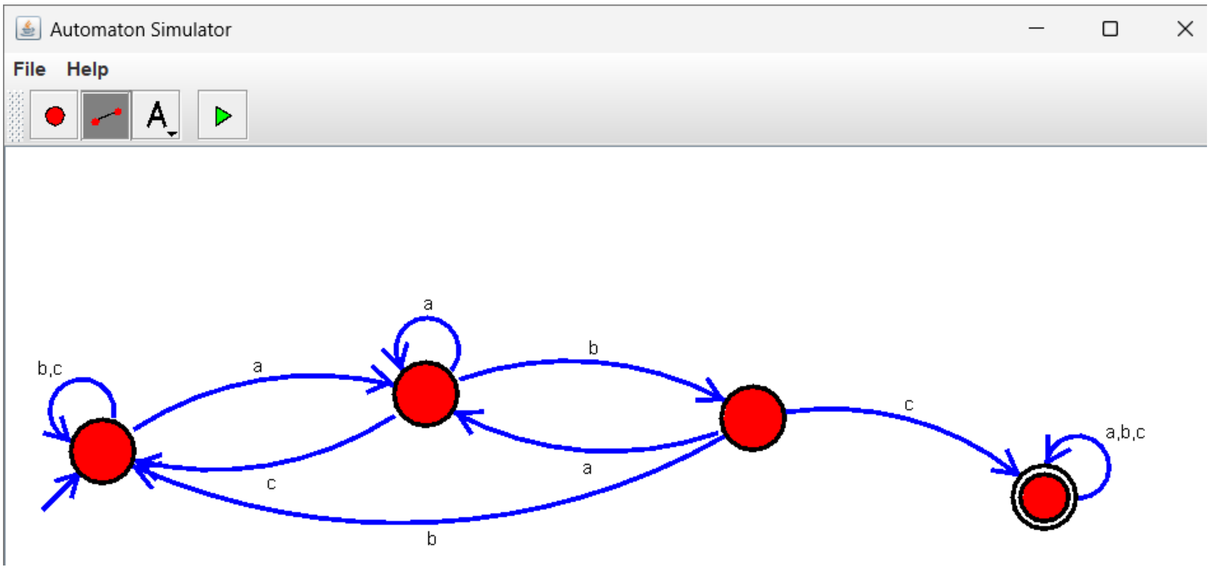
31. Design PDA using simulator to accept the input string anbn



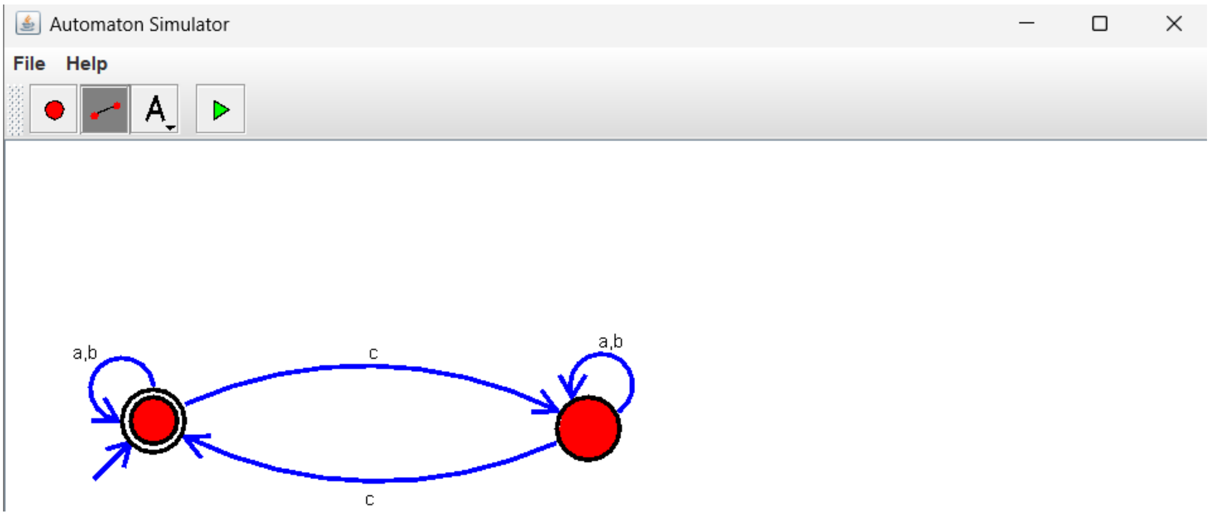
32. Design TM using simulator to perform string comparison where w={aba aba}



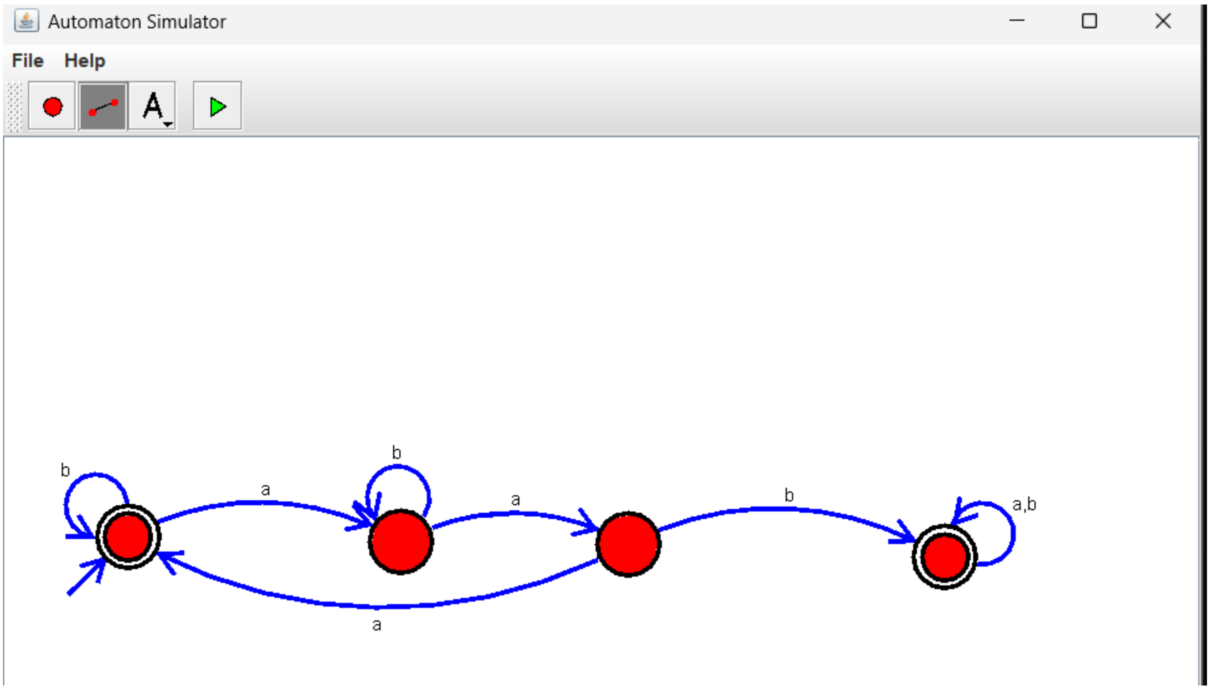
33. Design DFA using simulator to accept the string having ‘abc’ as substring over the set {a,b,c}



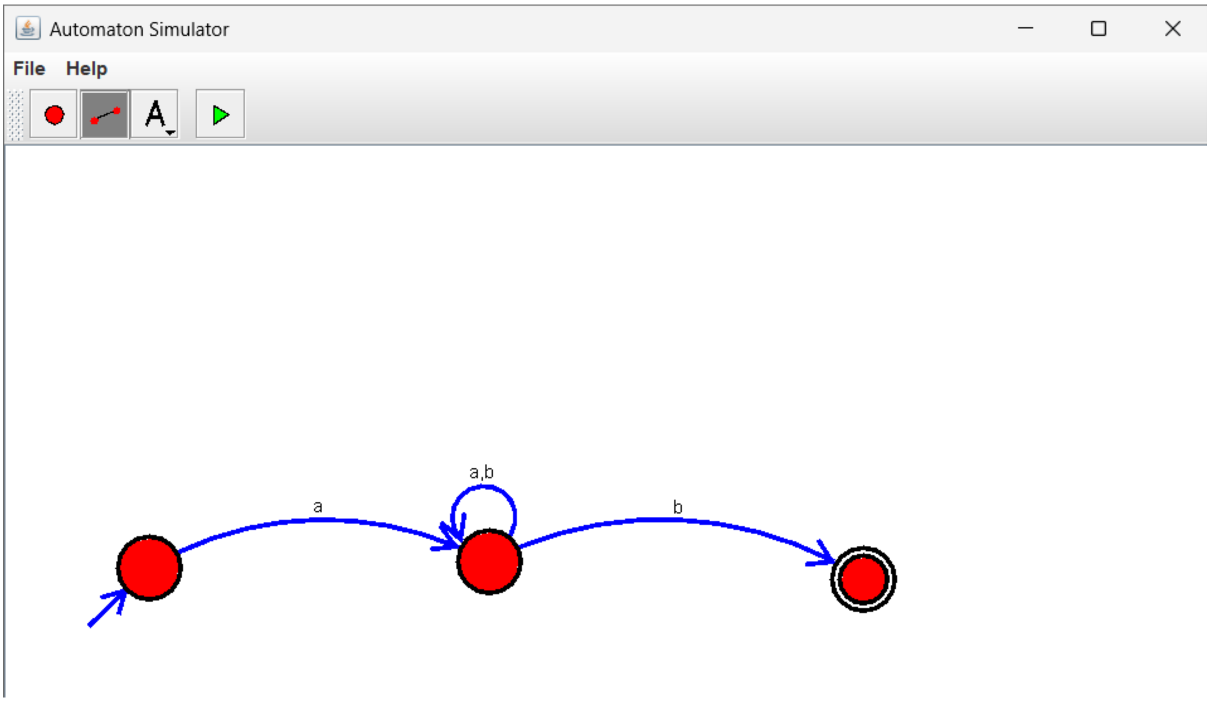
34. Design DFA using simulator to accept even number of c's over the set {a,b,c}



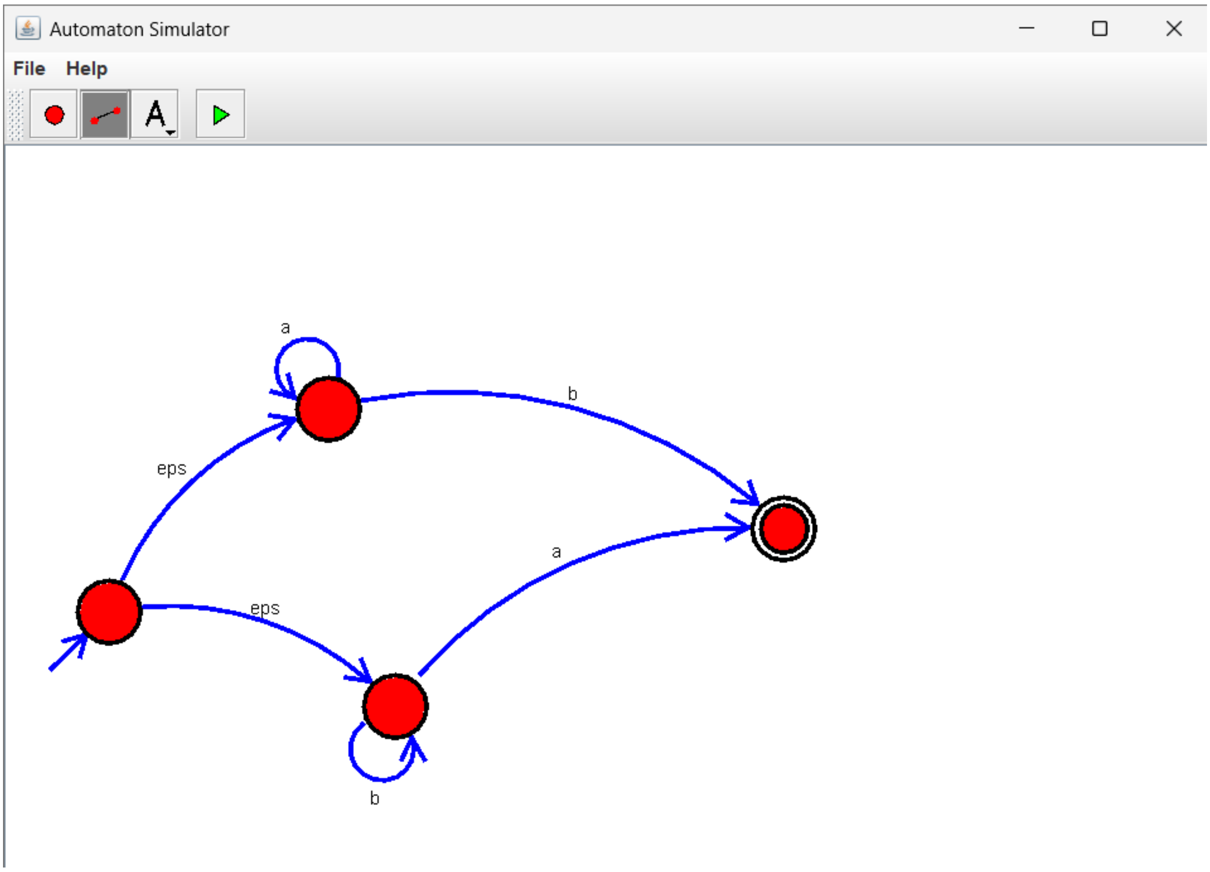
35. Design DFA using simulator to accept strings in which a's always appear tripled over input {a,b}



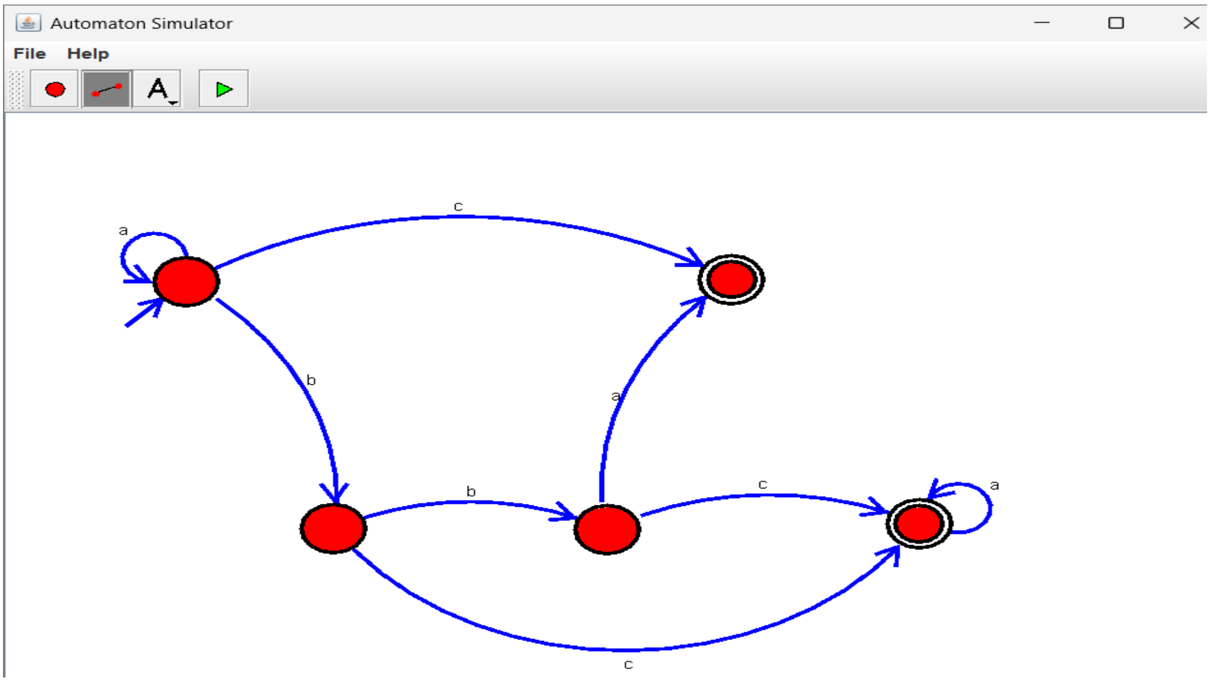
36. Design NFA using simulator to accept the string the start with a and end with b over set {a,b} and check W= abaab is accepted or not.



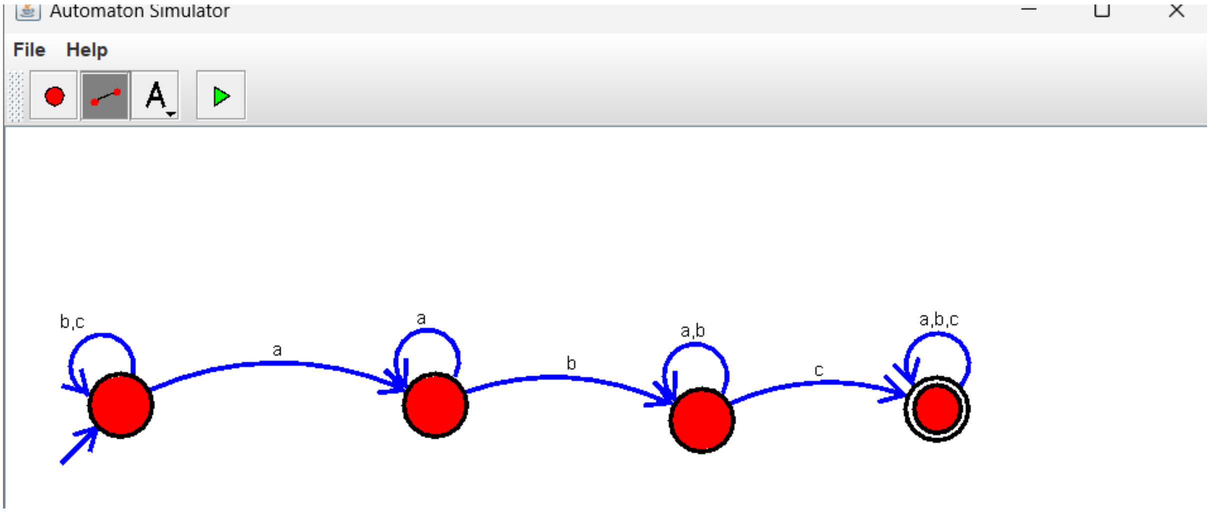
37. Design NFA using simulator to accept the string that start and end with different symbols over the input {a,b}.



38. Design NFA using simulator to accept the input string “bbc” ,”c”,and ”bcaaa”.



39. Design DFA using simulator to accept the string the end with abc over set {a,b,c)
W= abbaababc



40. Design NFA to accept any number of b's where input={a,b}.
